Charlotte, NC

Professional Summary

Data science undergraduate with experience in Python, regression modeling, and systems engineering. Skilled in analyzing data, building predictive models, and deploying technical solutions. Seeking an internship to apply data-driven insights in a real-world environment.

Education

University of North Carolina at Charlotte

Charlotte, NC

- B.S. Degree in Data Science
- Associate's Degree in Communications

Expected December 2027
May 2020

Relevant Coursework

- Mathematics – Pre-Calculus | Calculus | Statistics 1 | Matrices & Linear Algebra
- Computer Science – Database Design and Implementation | Data and Society | Business Computing | Computer Science I & II | Model & Society | Data Structures & Design | Logic & Algorithms

Work Experience

Benjamin Moore

- **Assistant Manager** August 2025 - Present
 - Responsible for all store operations including inventory management, reports, scheduling, and all cash flow for the store.
 - Maintained communication lines with in-house sales rep while creating and managing client accounts.
 - Oversaw employee training and onboarding procedures.

Batteries Plus Bulbs

- **Assistant Manager – Head Device Repair Technician** July 2021 – August 2025
 - Obtained Apple and Wise technical certifications.
 - Managed intakes and repairs that came through the store.
 - Handled insurance claims for devices and executed repairs through all of Apple's protocols.
 - Regularly maintained commercial clients' accounts including deliveries and account balances.

Projects

- **Bank Of America Data Analysis Research Project - OLS Regression Analysis**
 - Research project for City of Charlotte to determine if splitting Bank of America Stadium renovation cost with Tepper Sports & Entertainment (TSE), owners of the NFL Panthers, is a worthwhile investment for city and tourism revenue.
 - Used API calls to collect other cities tourism and city revenue data; Cleaned data using Python.
 - Used Python (pandas, statsmodels, seaborn) to analyze correlations and OLS Regression models to create predictions based on collected data.
- **Winter Olympic Data Analysis Research Project - OLS Regression Analysis**
 - Built regression models using Python (pandas, statsmodels) to analyze 2022 Winter Olympic data and make future Olympic predictions.
 - Cleaned and structured datasets to improve model accuracy.
 - Generated predictive insights and evaluated model performance compared to 2026.
- **Self-Hosted Linux Server**
 - Built and deployed an Ubuntu server with Docker applications.
 - Configured reverse proxy, subdomains, and Cloudflare integration.
 - Managed networking, system performance, and containerized services.

Skills

- **Programming Languages:** Python, Java, SQL, HTML, Jupyter Notebooks
- **Familiar Operating Systems:** macOS, Windows, Linux
- **Certifications:** IRP Apple Repair Certification, Wise 1, Wise 2, Samsung Repair Certification.
- **Technical Skills:** Microsoft Office Suite, Device Technician, Generative AI, Data Automation, Advanced Linux distribution knowledge, Cloudflare.
